CONTENTS

Tectonophysics Volume 215

Special Issue: Geodynamics of Rifting, Part III. Thematic Discussions (edited by P.A. Ziegler)

The role of rifting in the evolution of the Earth's crust
V.Y. Khain (Moscow, Russian Federation) 1
Plate tectonics, plate moving mechanisms and rifting
P.A. Ziegler (Basel, Switzerland) 9
Rifting of Africa and pattern of mantle convection beneath the African plate
N. Pavoni (Zürich, Switzerland) 35
Aulacogens and aulacogeosynclines: Regularities in setting and evolution
E.E. Milanovsky (Moscow, Russian Federation) 55
From rifting to passive margin: the examples of the Red Sea, Central Atlantic and Alpine Tethys
P. Favre and G.M. Stampfli (Lausanne, Switzerland) 69
Modelling the loading stresses associated with active continental rift systems
M.H.P. Bott (Durham, UK) 99
The mechanics of continental extension and sedimentary basin formation: A simple-shear / pure-shear flexural cantilever model
N.J. Kusznir (Liverpool, UK) and P.A. Ziegler (Basel, Switzerland) 117
Modeling the tectonic development of the Tucano and Sergipe-Alagoas rift basins, Brazil
G.D. Karner (New York, NY, USA), S.S. Egan (Staffordshire, UK) and J.K. Weissel (New York, NY, USA) 133
Variation in extensional fault geometry related to heterogeneities within basement and sedimentary sequences
J.-J. Jarrige (Pau, France) 161
Intraplate stresses and dynamical aspects of rifted basins
S. Cloetingh and H. Kooi (Amsterdam, The Netherlands) 167
Role of crustal stretching on subsidence of the continental crust
E.V. Artyushkov (Moscow, Russian Federation) 187
Development of asymmetric basins along continental transform faults
Z. Ben-Avraham (Tel Aviv, Israel) 209
Geodynamics of rifting and implications for hydrocarbon habitat
P.A. Ziegler (Basel, Switzerland) 221

Editorial i

Research Papers
SEM / STEM observation of magnetic minerals in presumably unremagnetized paleozoic carbonates from Indiana and Alabama
D. Suk, R. Van der Voo and D.R. Peacor (Ann Arbor, MI, USA) 255
Seismic imaging of Late Palaeozoic–Early Mesozoic extensional and contractional structures in the Bowen and Surat basins, eastern Australia
R.J. Korsch, K.D. Wake-Dyster and D.W. Johnstone (Canberra, ACT, Australia) 273
Neogene lateral extension during convergence in the Central Alps: Evidence from interrelated faulting and backfolding around the Simplonpass (Switzerland)
N.S. Mancktelow (Zürich, Switzerland) 295
Patterns of folding and fold interference in oblique contraction of layered rocks of the inverted Cobar Basin, Australia
J.V. Smith and B. Marshall (Broadway, N.S.W., Australia) 319
Palaeomagnetic and structural evidence of Neogene tectonic rotation of the Gran Sasso range (central Apennines, Italy)
F. Dela Pierre (Torino, Italy), F. Ghisetti (Catania, Italy), R. Lanza and L. Vezzani (Torino, Italy) 335
Boundary conditions in sandbox models of crustal extension: an analysis using distinct elements
S.D. Saltzer (Stanford, CA, USA) 349

Letter Section

Frequency–magnitude relationship and Poisson's ratio in the Pyrenees, in relation to earthquake distribution
J.-D. Njike-Kassala and A. Souriau (Toulouse, France), J. Gagnepain-Beyneix (Paris, France), L. Martel and M. Vadell (Toulouse, France) 363

Contents Volume 215 371
